of agriculture. Under the Ninth Plan and the Tenth Plan, an average investment on agriculture and irrigation has come down from 14.4 per cent to 11.4 per cent. Sir, the NDA Government has been spending more time in keeping their flock together than to look to the interests of the farmers. If this Government continues to neglect the interests of the farmers, they will be thrown to the dustbin of the history.

Sir, through you, I would like to draw the attention of this House to what happened in Indonesia under the rule of Mr. Suharto, who was one of the most powerful Presidents, which Indonesia ever had. For only 10 to 15 days there was no availability of food products in the market. As a result his Government was overthrown. Similarly, once considered as the super-power, the Soviet Union was broken into pieces giving rise to the formation of the Commonwealth of Independent States simply because there was a food shortage for a few years.
